

## *For the Special Day*

### **This beautiful Garland has been handcrafted just for You**

- ◇ Refrigeration is optimal for keeping garland fresh prior to the event. As an alternative, store garland in a cool place, open box and spritz with water.
- ◇ Once garland has been placed or hung it will last longer if kept away from direct sun exposure or wind. Care for the garland as if it were flowers.
- ◇ Garland may be cut into various lengths with a pair of sharp pruners and ends tied off with floral wire or zip ties to prevent it from unraveling.
- ◇ Flowers may be attached using floral wire, hot glue gun or zip ties. Flower stems may also be inserted into water tubes before attaching to garland.
- ◇ Greens are fastened with nylon twine and wire making the garland durable enough to drape over an Alter or archway.
