

The Brondell Swash fits most residential toilets, including many contoured one-piece fixtures. Unless you have a toilet with a square bowl or unusual shape, the Swash should fit your toilet. To confirm, please double check all measurements prior to ordering. To insure proper fit, simply follow the instructions below:

- 1) Using the diagram below, measure to determine if you have a round or elongated fixture.
- 2) Measure the distance between your mounting bolt holes to determine proper fit.
- 3) Lastly, measure the distance from the center of the bolt holes to the toilet tank to determine proper clearance.

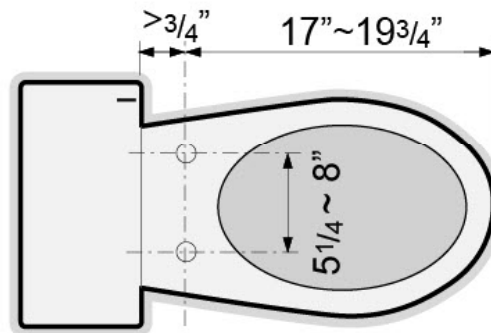

If you have any questions regarding compatibility or fit, please give Brondell a call toll free at 1-888-542-3355 or send us an email: support@brondell.com

Swash Fit Diagram: S900 & S1000 Series

The Brondell Swash fits most one-piece toilets, even those with curved tanks

Swash Fit Diagram: Ecosat 100 Series

Note: the Swash Ecosat 100 is designed to fit elongated toilets only, however this model will in fact fit select round fixtures. Please reference the fit diagram for size verification. The Swash Ecosat 100 will not fit French curve fixtures.
